

Commission Portal Install & Update Guide

Finance Commission Dashboard · Version 1.2.26 · September 2026

A short guide for everyone using the Commission Portal, on **Windows or Mac**. You install it **once** — about 5 minutes, with nothing to install beforehand — and after that it keeps itself up to date. (See also [Using the Portal.](#))

PART 1 Installing

Step 1 — Download the Portal

- 1 Open the [Commission Portal download page](#) and scroll down to the **Assets** list.
- 2 **Windows:** download `CommissionDashboard-Setup-....exe`.
- 3 **Mac:** Apple menu → **About This Mac**. **Apple M1/M2/M3...** → `...-macos-arm64.dmg`; **Intel** → `...-macos-intel.dmg`.

Step 2 — Install

WINDOWS

- 1 Open the file you just downloaded.
- 2 If a blue **Windows protected your PC** box appears: **More info**, then **Run anyway**. Normal for any new app.
- 3 Click **Next** through the screens — tick **Create a desktop shortcut** if you want one — then **Install**.

MAC

- 1 Open the `.dmg`. Drag the **Commission Dashboard** folder onto **Applications** and wait — it is about 700 MB.
- 2 Open it from **Applications**, never from the disk image.
- 3 macOS blocks it the first time. Right-click **CommissionDashboard** → **Open** → **Open**. On **Sequoia or newer**: **System Settings** → **Privacy & Security** → **Open Anyway**.
- 4 Drag refused (*you do not have permission*)? Double-click **Install Commission Dashboard** on the disk image instead.

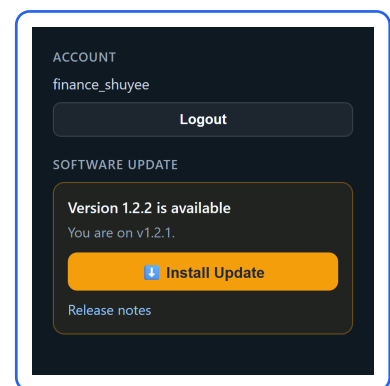

Step 3 — Open the Portal and log in

Windows: Start Menu → **Finance Commission Dashboard**. **Mac:** **Applications** → **Commission Dashboard**. Log in with the **username and password IT gave you** — your account already exists, there is nothing to create. The first load takes a moment while it fetches the year's data. **You are done.**

PART 2 Updating

You do not have to do anything. The Portal checks for new versions itself, on Windows and Mac alike. When one is ready, the **Software Update** box on the right appears at the **bottom of the left-hand menu**.

- 1 Click **Install Update**, then **OK**.
- 2 Wait a minute or two — a progress bar runs, the Portal restarts and the page reloads on its own. **Do not close the window.**
- 3 **No button?** The box says *Ask an admin to install it* — nothing for you to do. Let your admin know.

Nothing of yours is lost. Logins, files and saved reports all stay.

You never download the installer again. Your version sits bottom-left.
