

Commission Portal Install & Update Guide

Finance Commission Dashboard · Version 1.2.1 · August 2026

A short guide for everyone using the Commission Portal. You install it **once**. After that it keeps itself up to date.

(Once it is running, see [Using the Commission Portal](#).)

PART 1

Part 1 — Installing

Set aside about 5 minutes. There is nothing to install beforehand — the Portal brings everything it needs with it.

Step 1 — Download the Portal

- 1 Go to the [Commission Portal download page](#)
- 2 Scroll down to the **Assets** list.
- 3 Click the file named `CommissionDashboard-Setup-....exe` to download it.

Step 2 — Run the installer

- 1 Open the file you just downloaded.
- 2 **If Windows shows a blue "Windows protected your PC" box:** click **More info**, then **Run anyway**. This is normal — Windows shows it for any app it has not seen before.
- 3 Click **Next** through the screens. Tick **Create a desktop shortcut** if you would like one.
- 4 Click **Install**.

Step 3 — Create your login

A black window opens briefly and asks you to create an account. Type a **username** and a **password** and press Enter. Write them down — this is how you log in.

Step 4 — Add your access keys

The Portal needs keys to reach the company data. **Ask IT for your access keys** — they will send you a few lines of text that look like `SOMETHING=a-long-code`.

- 1 Open the Portal's folder. The installer shows you where it is — the folder is called **Commission Dashboard**.
- 2 Find the file named `.env` and open it with Notepad (right-click → **Open with** → **Notepad**).
- 3 Go to the end of the file and paste in the lines IT sent you, each on its own line.
- 4 Save (**Ctrl+S**) and close Notepad.

Keep these keys private. Do not email them or send them in a chat message.

Note for IT: the account-creation step above (Step 3) already needs `PG_MIRROR_TOKEN` to reach the shared database, so the keys have to be in place *before* that step, not after. In practice, seed `.env` during the install rather than leaving it to the user.

Step 5 — Open the Portal

Start Menu → **Finance Commission Dashboard** (or the desktop shortcut).

Log in with the username and password from Step 3. The first load takes a moment while it fetches the year's data. **You are done.**

PART 2

Part 2 — Updating

Short version: you don't have to do anything. The Portal checks for new versions by itself and tells you when one is ready.

When an update is ready

A **Software Update** box appears at the **bottom of the left-hand menu**, showing the new version number.

The Software Update panel, showing a new version available with an Install Update button

If you see an "Install Update" button:

- 1 Click **Install Update**.
- 2 Click **OK** on the confirmation message.
- 3 Wait. A progress bar runs, the Portal restarts itself, and the page reloads on its own. This takes a minute or two.
- 4 **Do not close the window while it is working.**

If you do not see a button, the box says "Ask an admin to install it." — there is nothing for you to do. Let your admin know.

Things worth knowing

✓ **Nothing of yours is lost.** Your login, your access key, your Excel files, saved reports and any rates you edited all stay exactly as they are. An update only replaces the program itself.

✓ **You never download the installer again.** Steps 1–5 above are one time only.

✓ **To check your version:** look at the bottom-left corner of the menu.

✓ **If an update fails**, the Portal puts the old version back by itself and keeps working. Tell IT so they can look into it.

TROUBLESHOOTING

If something goes wrong

WHAT YOU SEE	WHAT TO DO
"Token expired"	Ask IT for a new access key, then redo Step 4
The Portal will not open	Tell IT — ask them to check <code>dashboard.log</code> in the Portal's folder
An update failed	Tell IT — ask them to check <code>dashboard.log</code>
Numbers look out of date	Wait a few minutes, or click Sync Data at the top right
