

Commission Portal

Install & Update Guide

Finance Commission Dashboard · Version 1.2.28 · September 2026

A short guide for everyone using the Commission Portal — on **Windows or Mac**. You install it **once**. After that it keeps itself up to date.

(Once it is running, see [Using the Commission Portal](#).)

PART 1

Part 1 — Installing

Set aside about 5 minutes. There is nothing to install beforehand — the Portal brings everything it needs with it.

Step 1 — Download the Portal

- 1 Go to the [Commission Portal download page](#).
- 2 Scroll down to the **Assets** list.
- 3 **Windows:** click `CommissionDashboard-Setup-....exe` to download it.
- 4 **Mac:** first check which chip your Mac has: Apple menu → **About This Mac**. If it says **Apple M1/M2/M3...**, download `CommissionDashboard-Setup-...-macos-arm64.dmg`. If it says **Intel**, download `CommissionDashboard-Setup-...-macos-intel.dmg`.

Step 2 — Install

WINDOWS

- 1 Open the file you just downloaded.
- 2 If Windows shows a blue "Windows protected your PC" box: click **More info**, then **Run anyway**. This is normal — Windows shows it for any app it has not seen before.
- 3 Click **Next** through the screens. Tick **Create a desktop shortcut** if you would like one.
- 4 Click **Install**.

MAC

- 1 Open the `.dmg` file you just downloaded.
- 2 Drag **CommissionDashboard** onto the **Applications** shortcut next to it.
- 3 Open **Applications** and double-click **CommissionDashboard**.
- 4 **macOS will refuse the first time**, saying it is from an unidentified developer. This is normal for apps outside the App Store. Right-click **CommissionDashboard**, choose **Open**, then click **Open** again.
- 5 **On macOS Sequoia or newer** there is no Open button in that message. Go to Apple menu → **System Settings** → **Privacy & Security**, scroll down, and click **Open Anyway**.
- 6 **The first start sets itself up before the dashboard appears**. It unpacks about 700 MB and takes a minute or two; the window tells you what it is doing. Later starts are quick.

Step 3 — Open the Portal

Windows: Start Menu → **Finance Commission Dashboard** (or the desktop shortcut).

Mac: **Applications** → **CommissionDashboard**.

Log in with the **username and password IT gave you**. There is no account to create — yours already exists. The first load takes a moment while it fetches the year's data. **You are done**.

PART 2

Part 2 — Updating

Short version: you don't have to do anything. The Portal checks for new versions by itself and tells you when one is ready. This works the same on Windows and Mac.

When an update is ready

A **Software Update** box appears at the **bottom of the left-hand menu**, showing the new version number.

The Software Update panel, showing a new version available with an Install Update button

If you see an "Install Update" button:

- 1 Click **Install Update**.
- 2 Click **OK** on the confirmation message.
- 3 Wait. A progress bar runs, the Portal restarts itself, and the page reloads on its own. This takes a minute or two.
- 4 **Do not close the window while it is working.**

If you do not see a button, the box says "Ask an admin to install it." — there is nothing for you to do. Let your admin know.

Things worth knowing

Nothing of yours is lost. Your login, your Excel files, saved reports and any rates you edited all stay exactly as they are. An update only replaces the program itself.

You never download the installer again. Steps 1–3 above are one time only.

To check your version: look at the bottom-left corner of the menu.

If an update fails, the Portal puts the old version back by itself and keeps working. Tell IT so they can look into it.

TROUBLESHOOTING

If something goes wrong

WHAT YOU SEE	WHAT TO DO
The Portal will not open	Tell IT — ask them to check <code>dashboard.log</code> in the Portal's folder
Mac: "cannot be opened because it is from an unidentified developer"	Expected once, the first time you open it. Right-click CommissionDashboard and choose Open , then Open again. On macOS Sequoia: System Settings → Privacy & Security → Open Anyway .
Mac: the window sits on "Setting up the dashboard for the first time"	That is the first launch unpacking about 700 MB. Give it a minute or two — it only happens once per version.
Mac: "you don't have permission" when dragging to Applications	Drop it into your own Applications folder instead: Finder → Go → Home → Applications . The Portal runs the same from either.
Mac: the Portal does not come back by itself after an update, and the page will not reload	Expected once, when updating from version 1.2.25 or earlier. Quit the Portal and open it again from Applications → CommissionDashboard . The update itself already installed correctly, and later updates restart on their own.
An update failed	Tell IT — ask them to check <code>dashboard.log</code>
Numbers look out of date	Wait a few minutes, or click Sync Data at the top right
