

COMMISSION CALCULATION FLOW AUDIT TRAIL

Complete calculation flow logic mapping database columns to commission payouts for ALL streams compiled by `build_commission_pack.py`.

1. Internal Basic Commission & Senior Override (Joshua Yap)

Invoice Number (invoice.invoice_number)	1008113
Total Amount (invoice.total_amount)	RM 130,000.00
Payment Received (invoice.paid_amount)	RM 130,000.00
Verification (Payment / Total = 100%)	Fully Paid (100.00%)
Agent Name (agent.name)	JOSHUA YAP JIA HAO (internal)
Reporting Senior Manager (via code logic)	CHING ZHE HANG

Step 1: Calculate Sales Price (Total - EPP):

Sales Price = RM 130,000.00

Step 2: Calculate Joshua's Own Basic Commission (Executive 3.00%):

Own Commission = RM 130,000.00 * 3.00% = RM 3,900.00

Step 3: Calculate Senior Reporting Override (+0.25% to Senior):

Senior Override = RM 130,000.00 * 0.25% = RM 325.00 (to CHING ZHE HANG)

2. Outsource Basic Commission & Overrides (Tan Sue Cherk)

Invoice Number (invoice.invoice_number)	INV-1008333
Total Amount (invoice.total_amount)	RM 19,565.75
Payment Received (invoice.paid_amount)	RM 19,565.75
Verification (Payment / Total = 100%)	Fully Paid (100.00%)
Agent Name (agent.name)	Tan Sue Cherk (outsource)
Agent Tier & Upline Manager (hierarchy info)	Tier: OSA 1 OUM Parent: Carol Siow

Step 1: Calculate Sales Price:

Sales Price = RM 19,565.75

Step 2: Calculate Tan Sue Cherk's Own Basic Commission (3.00%):

Own Commission = RM 19,565.75 * 3.00% = RM 586.97

Step 3: Calculate OGM Override (Gan Lai Soon gets 0.75% because tier is OSA 1):

OGM Override = RM 19,565.75 * 0.75% = RM 146.74

Step 4: Calculate OUM Override (OUM Parent Carol Siow gets 0.50% of Own Commission):

OUM Override = RM 586.97 * 0.50% = RM 2.93

3. EPP Interest Deduction and Referral Fee (Tan Jia Hao)

Invoice Number (invoice.invoice_number)	1000898
Total Amount (invoice.total_amount)	RM 40,300.00
Payment Received (invoice.paid_amount)	RM 40,300.00
Verification (Payment / Total = 100%)	Fully Paid (100.00%)
Agent Name (agent.name)	TAN JIA HAO
Referral Name (invoice.referrer_name)	Safwan
EPP Interest Item (invoice_item)	RM 1,200.00

Step 1: Calculate Sales Price (EPP Deducted):
Sales Price = RM 40,300.00 - RM 1,200.00 = RM 39,100.00

Step 2: Calculate Referral Fee (Referrer: Safwan gets 2.00%):
Referral Fee = RM 39,100.00 * 2.00% = RM 782.00

4. NFP (Net Floor Price) Commission Flow (Ling Liang Kang)

Invoice Number (invoice.invoice_number)	INV-1008636
Total Amount (invoice.total_amount)	RM 24,054.00
Payment Verification Status	100% Paid (paid = TRUE or percent_of_total_amount >= 1.0)
Agent Name (agent.name)	LING LIANG KANG
System Price (invoice_item.unit_price)	RM 30,794.00
Net Floor Price (package.nett_price)	RM 22,720.00

Step 1: Calculate Component A (Sales Price exceeds Net Floor Price):
Component A = Max(0, Sales Price - Net Floor Price) * 25.00% = Max(0, RM 24,054.00 - RM 22,720.00) * 25.00% = RM 333.50

Step 2: Calculate Component C (Sales Price falls short of Net Floor Price):
Component C = Max(0, Net Floor Price - Sales Price) * 20.00% = Max(0, RM 22,720.00 - RM 24,054.00) * 20.00% = RM 0.00

Step 3: Calculate NFP Commission Payout (Component A - Component C):
NFP Commission = RM 333.50 - RM 0.00 = RM 333.50

5. ANP Monthly Commission Flow (Tan Jia Hao)

Agent Name (agent.name)	TAN JIA HAO
Invoicing Month (calendar month)	February 2026
Payment Verification Status	First Payment Secured (1st_payment_date IS NOT NULL)
Payout Month (timing remark)	March 2026
Distinct Invoices Secured	3 invoices
Invoices Details list	• Invoice 1008540 (2026-02-02): RM 21,000.00 • Invoice 1008541 (2026-02-02): RM 22,240.00 • Invoice INV-1008377 (2026-02-23): RM 20,500.00

Step 1: Sum Invoices' Total Amount for Calendar Month:
Accumulated Total = RM 21,000.00 + RM 22,240.00 + RM 20,500.00 = RM 63,740.00

Step 2: Check ANP Tier for Accumulated Total:
Tier Mapping: RM 60k - 180k = RM 500 payout flat rate

Step 3: Determine Commission Payout:
ANP Commission Payout = RM 500.00

6. EGA / ESA Awards EP Point Calculation Flow

Payment Verification Status	>=5% Paid (percent_of_total_amount >= 5.0)
Standard Residential Rate (always)	1 EP Point per RM 1 Sales Price
Factory Rate (Post-May 2026)	first RM 40,000 at 100%, balance at 40%
EGA (Half-Year) Target Threshold	> 600,000 EP Points
ESA (Full-Year) Target Threshold	> 1,300,000 EP Points

Step 1: Calculate Residential Invoice EP Points:
Points = RM 25,000.00 = 25,000 EP Points

Step 2: Calculate Factory Invoice EP Points (post-May 2026, RM 100k Sales Price):
Points = RM 40,000 + (RM 60,000 * 40.00%) = 64,000 EP Points

Step 3: Check cumulative qualification status:
Cumulative EP Points = RM 625,000.00 (EGA Qualified!)

7. Production Bonus Calculation Flow (OUM Team-based)

Team Total Sales (Threshold: >= RM 2.0M)	RM 2,450,000.00
OUM Personal Sales (Threshold: >= RM 300k)	RM 320,000.00
OUM Production Bonus Rate	0.50% of Team Total Sales

Step 1: Check eligibility criteria (both conditions must be met):
Team Total >= 2.0M (Yes) AND Personal Sales >= 300k (Yes)

Step 2: Calculate OUM Production Bonus payout:
Production Bonus = RM 2,450,000.00 * 0.50% = RM 12,250.00
