

# Commission Portal

## Install & Update Guide

Finance Commission Dashboard · Version 1.2.12 · August 2026

A short guide for everyone using the Commission Portal — on **Windows or Mac**. You install it **once**. After that it keeps itself up to date.

(Once it is running, see [Using the Commission Portal](#).)

### PART 1

## Part 1 — Installing

Set aside about 5 minutes. There is nothing to install beforehand — the Portal brings everything it needs with it.

### Step 1 — Download the Portal

- 1 Go to the [Commission Portal download page](#).
- 2 Scroll down to the **Assets** list.
- 3 **Windows:** click `CommissionDashboard-Setup-....exe` to download it.
- 4 **Mac:** click `CommissionDashboard-Setup-...-macos.dmg` to download it.

### Step 2 — Install

#### WINDOWS

- 1 Open the file you just downloaded.
- 2 **If Windows shows a blue "Windows protected your PC" box:** click **More info**, then **Run anyway**. This is normal — Windows shows it for any app it has not seen before.
- 3 Click **Next** through the screens. Tick **Create a desktop shortcut** if you would like one.
- 4 Click **Install**.

#### MAC

- 1 Open the `.dmg` file you just downloaded.
- 2 Drag **Commission Dashboard.app** into your **Applications** folder.

- 3 If macOS says the app is from an unidentified developer: right-click the app, choose **Open**, then click **Open** again. This is normal for apps outside the App Store.
- 4 Close the installer window.

## ✓ Step 3 — Open the Portal

**Windows:** Start Menu → **Finance Commission Dashboard** (or the desktop shortcut).

**Mac:** **Applications** → **Commission Portal**.

Log in with the **username and password IT gave you**. There is no account to create — yours already exists. The first load takes a moment while it fetches the year's data. **You are done.**

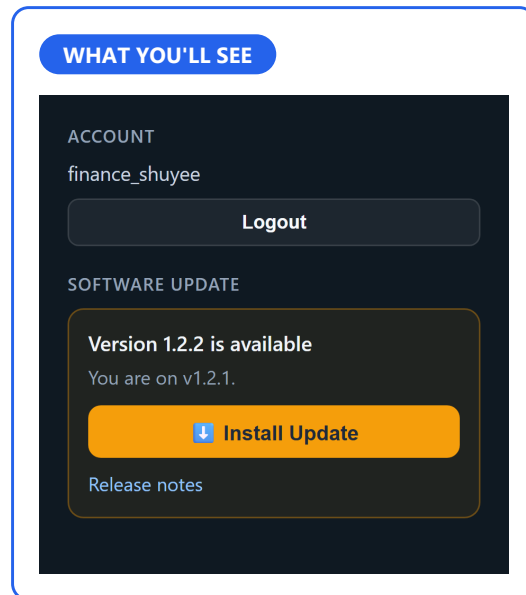

## PART 2

## ↻ Part 2 — Updating

**Short version: you don't have to do anything.** The Portal checks for new versions by itself and tells you when one is ready. This works the same on Windows and Mac.

### When an update is ready

A **Software Update** box appears at the **bottom of the left-hand menu**, showing the new version number.

*The Software Update panel, showing a new version available with an Install Update button*

### If you see an "Install Update" button:

- 1 Click **Install Update**.
- 2 Click **OK** on the confirmation message.

- 3 Wait. A progress bar runs, the Portal restarts itself, and the page reloads on its own. This takes a minute or two.
- 4 **Do not close the window while it is working.**

If you do not see a button, the box says "Ask an admin to install it." — there is nothing for you to do. Let your admin know.

## Things worth knowing

**Nothing of yours is lost.** Your login, your Excel files, saved reports and any rates you edited all stay exactly as they are. An update only replaces the program itself.

**You never download the installer again.** Steps 1–3 above are one time only.

**To check your version:** look at the bottom-left corner of the menu.

**If an update fails,** the Portal puts the old version back by itself and keeps working. Tell IT so they can look into it.

## TROUBLESHOOTING

## If something goes wrong

| WHAT YOU SEE                                                                | WHAT TO DO                                                                                                                                                          |
|-----------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| The Portal will not open                                                    | Tell IT — ask them to check <code>dashboard.log</code> in the Portal's folder                                                                                       |
| <b>Mac:</b> "cannot be opened because it is from an unidentified developer" | Right-click <b>Commission Portal.app</b> and choose <b>Open</b> , then click <b>Open</b> again. You only need to do this the first time.                            |
| <b>Mac:</b> "Commission Portal is damaged and can't be opened"              | The download did not finish cleanly. Delete the app, download the <code>-macos.zip</code> again from the release page, and open it with right-click → <b>Open</b> . |
| An update failed                                                            | Tell IT — ask them to check <code>dashboard.log</code>                                                                                                              |
| Numbers look out of date                                                    | Wait a few minutes, or click <b>Sync Data</b> at the top right                                                                                                      |
